## Faculty of Engineering

Approved by AICTE, MS (New-Int)-Engg./2009/09, Dt. 15/06/09, Affiliated to Savitribai Phule Pune University

### 7.1.2.1 The Institution has facilities and initiatives for alternate sources of energy and energy conservation measures

Sr.No.	Particular
1	Solar Energy
2	Sensor-based energy conservation
3	Use of LED bulbs

#### 1. Solar Energy:

The HSBPVT GOI Faculty of Engineering installed a solar plant on its own dime as a step towards environmental consciousness. We have a 1 kW rooftop solar power system installed. It is anticipated to produce more than 3,000 units annually. The newly erected solar power plant will lessen emissions that contribute to climate change. This plan makes a significant effort to preserve and safeguard the natural environment in addition to reducing reliance on oil and other fossil fuels.

### 7.1.2.2. The Institution has facilities and initiatives for Management of the various types of degradable and non-degradable waste

Through a system that allows the used material to be reused, guaranteeing that less natural resources are consumed. As a result, HSBPVT's GOI FOE core operations have very little of an impact on the environment.

The college has divided its trash into two categories:

1. Management of Solid Waste
2. Management of E-Waste
3. Waste recycling system

#### (1) Solid waste

The College produces garbage from a variety of normal activities that involve paper, plastics, glass, metals, meals, and other materials. On every level and at every source, the trash is separated. Each block's administrative supervisor makes sure that the waste is collected at predetermined times from each floor.

The Green and Blue dustbins (given at each floor) are collected, cleaned, segregated and compiled by the block safai personnel.

The floor dustbins are emptied and carried to the College's designated dumping yard in mobile containers or dustbins that are given for each block. An authorized vendor who picks up rubbish from the designated location has been contacted by the College.

#### 2. E-Waste Management:

Electronic waste produced by devices like computers, printers, fax machines, and photocopiers is correctly recycled, including flip flops, memory chips, motherboards, CDs, and cartridges.

## Faculty of Engineering

Approved by AICTE, MS (New-Int)-Engg./2009/09, Dt. 15/06/09, Affiliated to Savitribai Phule Pune University

For technology upgrades, buyback options are used rather than purchasing a new computer.

Electronic garbage produced by hardware that cannot be recycled or reused is disposed of centrally by vendors.

### 3. Waste recycling system:

Colleges emphasize paperless offices to reduce printer carbon emissions. On campuses, one-sided paper is also reused. Most work is done digitally. Both the employee section and the account section use ERP software.

### 7.1.2.3 The Institution has facilities of water conservation and distribution

Sr.No.	Particulars
1	Rain water harvesting
2	Bore well /Open well recharge
3	Maintenance of water bodies and distribution system in the campus

#### 1. Rain Water-Harvesting:

Rainwater harvesting a study on roof top and rainwater harvesting was conducted. The water from the roof is gathered and directed a mechanism for collecting rainwater has been designed to use it properly. The college conducts an analysis of the campus's drinking and restroom Water once a, semester. Rainwater is collected and piped down to a well from the Testing of Material

### 3.Maintenance of water bodies and distribution system in the campus

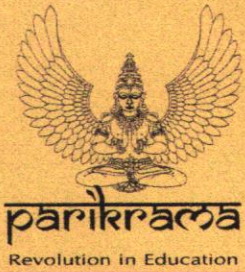

In order to provide the campus with water that is economical, consistent, safe, and sufficient, the water bodies are periodically maintained. The major goal of maintenance is to create an atmosphere free of infections. To eliminate viruses, bacteria, and other germs present in the water on campus, chlorination will be used. It is primarily done to stop the spread of water-borne illnesses like cholera, dysentery, and typhoid, among others. Water is distributed using a sophisticated network of pipes. The water is purified by the processes of ozonization and reverse osmosis, provided through a different kind of distribution system, and another set of distribution pipes are utilized for all other purposes. With the aid of low flow plumbing

### 7.1.2.4 The Institution has facilities and initiatives for Green Campus Initiatives:-

Sr. No	Particular
1	Green Campus Policy
2	Institute Greenery
3	Digital Library
3	Pedestrian Friendly Pathway
4	Paperless office
5	Tree Plantation
6	Vehicle Restricted Entry

#### 1) Green Campus Policy

##### a) Restricted Entry of Vehicles :-

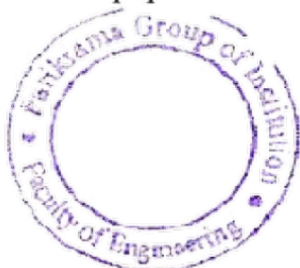

- All the vehicles of college staff/faculty members should be getting the emission checking the vehicle at the entrance.
- The college encourages the employees and students to frequently use public transport, bicycles, electric vehicles etc. to limit emissions.

##### b) Pedestrian-friendly Pathways :-

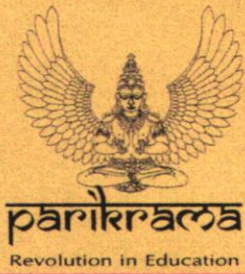

- HSBPT's GOI FOE follows the Pedestrian-friendly Pathways.
- Pedestrian-friendly Pathways are properly mark with suitable logo/sign.

##### c) Paper Less Office :-

- All staff used ERP software for Leave system.
- One side paper reused.

### Green Campus Policy

#### Following are the initiatives taken for the Green Campus Policy:-

a) Restricted Entry of Vehicles :-

- All the vehicles of college staff/faculty members should be getting the emission checking the vehicle at the entrance.
- The college encourages the employees and students to frequently use public transport, bicycles, electric vehicles etc. to limit emissions.

b) Pedestrian-friendly Pathways :-

- HSBPT's GOI FOE follows the Pedestrian-friendly Pathways.
- Pedestrian-friendly Pathways are properly mark with suitable logo/sign.

c) Paper Less Office :-

- All staff used ERP software for Leave system.
- One side paper reused.

d) Ban on Use of Plastic :-

- The institute is continuously work towards plastic-free campus.
- In the HSBPVT's GOI FOE institute there is complete ban on single-use plastics in class room, labs, mess, canteen etc. in the institute premises.
